

# **International Conference on Process Safety Performance Indicators Results of Working Session 1**

**31st January – 1st February 2012**

**Dr.-Ing. Peter G. Schmelzer, Bayer HealthCare AG  
Chairman CEPIC Issue Team Process and Plant Safety**

# Key insights & conclusions Working sessions 1

---

- *What do we have in **common**, where are the **differences**?*
  - *Highlight business ownership!*
  - *Start at the top (corporate)...but ensure it works at the bottom (site)!*
  - *Maintain regular feedback to all stakeholders!*
  - *Use existing systems for reporting!*
  - *Keep it easy!*
- *Starting point*
- *Organization*

- *Does experience show that there is higher visibility of process safety, improved internal reporting and better performance as a result of metrics?*
  - *Yes, but performance sometimes seemed to decay...*
  - *...which is not true; you simply see more!*
  - *Yes, when the Board is in the game!*
  - *It's a long way to go (3 – 5 years)...*

- *What is the way forward together for key stakeholders?*
  - *Just do it!*
  - *Use the implementation to adjust the mindset of the management!*
  - *Adapt the process to the hazards you have to control!*

## ■ *Management of Change of your Organization*
