Decontaminate fire fighting equipment to become PFAS/fluor free

PFAS are known as 'forever chemicals' as they are extremely persistent in our environment and bodies. They can lead to health problems such as liver damage, thyroid disease, obesity, fertility issues and cancer.

LifeClean is a Swedish RnD company developing products for PFAS sanitation and disinfection. LifeClean holds 29 patents in 25 countries and new patent pending. LifeClean Sani A is a product of stabilized chlorine dioxide in water and has proven to be extremely effective for PFAS removal.

Aspects to be discussed in an interactive setting

- New industry best practice for firetrucks, fire extinguishers and sprinkler systems
- The LifeClean PFAS Decontamination process
- Clean water tech for PFAS
- Eurofins third-party validation of the LifeClean method and process

Firetrucks

Fire extinguishers

Sprinkler systems
