Scope

The most important conference worldwide on loss prevention in the process industries now comes to the TUDelft in the Netherlands.

Since its first edition in 1974 in Delft, occupational and process safety professionals, researchers, scientists, academics and practitioners have been meeting on a triennial basis at the Loss Prevention Symposia across Europe. The conference series has been successful in stimulating and sharing both theoretical and practical knowledge among the Loss Prevention community worldwide. Thanks to this dissemination of wisdom, considerable progress has been achieved in the field of safety in the chemical and process industries worldwide.

Every edition there are between 350 to 600 participants attending the congress.

Topics

- Risk assessment and safety management
- Human and organisational factors of risk and safety
- Process safety engineering and technological innovations
- Fires, explosions, and toxic releases
- Simulation and modelling for safer processes
- Physical security and cyber security in process plants
- Learning from accidents and process safety education
- Communication of risk and process safety information
- Leadership, risk governance, and regulatory issues
